APPROVED LIST OF BREATH ALCOHOL IGNITION INTERLOCK DEVICES (BAIID's)

Pursuant to Colorado Revised Statutes section 42-2-132.5 (7)(a), effective January 1, 2001:

For the purposes of this section, "approved ignition interlock device" means a device approved by the department of public health and environment that is installed in a motor vehicle and that measures the breath alcohol content of the driver before a vehicle is started and that periodically requires additional breath samples during vehicle operation. The device may not allow a motor vehicle to be started or to continue normal operation if the device measures an alcohol level above the level established by the Department of Public Health and Environment.

And pursuant to the Rules and Regulations of the Colorado State Board of Health, Ignition Interlock Devices 5 CCR 1005-3 Section 1.1:

Statement of Basis and Purpose: The following rules and regulations shall govern the approval of ignition interlock devices, also known as breath alcohol ignition interlock devices, and shall establish the setpoint breath alcohol concentration at which the device will prevent a motor vehicle from starting.

TO: Whom It May Concern
